

DIALES Book Launch for The Expert Witness in Construction

DIALES was delighted to host an evening of good food, wine, music, and literature at Trinity House London on 30th January 2014. The spectacular venue was the location for our launch of DIALES expert John Mullen's new co-authored book *The Expert Witness in Construction*.

The book explains, in practical terms, the way in which experts work with particular reference to the construction industry. The evening was a great success, giving our clients the opportunity to meet the DIALES experts who 'write the textbooks' on expert witness services.

We look forward to more of the same in future. Please contact info@diales.com if you would like to be kept informed about the upcoming events in the DIALES calendar.
